# strengths

We are currently Partnering with Iraqcell in Kurdistan and Managing there Fiber network which covers the area from Zakho to Kirkuk trough Erbil & Kirkuk. so we have the ability with ITPC to have a full solution of connectivity from Faw to Zakho

Partnership with Bktel Communication - Germany is a company based in Germany, specialized in the design, supply, installation and maintenance of fiber networks. A complete fiber path for multi points to customized solutions for SMEs.

# Fiber Networks Deployments – Partner Bktel Germany

## OUR Proposal

- ▶ Partnership with ITPC to provide full connectivity solution through Iraq.
- ▶ Establish boarder connection with Turkey to Europe
- ▶ Consortium with ITPC to provide Transit connectivity services via Iraq between Gulf & Europe
- ▶
- ▶ Establish strong partnership with key players in the Telecom Market, equipped with the most advanced technology and international connectivity access to the main service Providers in in Equinex Frankfort to provide our corporate customers and ISP with IP transit service in Iraq
- ▶ Build Data Center in Baghdad to service the local market and the main key telecom players in the region.

## WHAT WE DO

- ▶ Our purpose is establish ourselves as the leading telecom Solutions service provider in Iraq . To achieve such prospective, we are working on introducing several avant-garde Technologies into the Iraqi market and studying their efficiency, overall performance and consumer feedback.
- ▶ Due to the expected high demand for the internet and data connectivity in Iraq and the region, we are planing to place Horizon Technology as the ITPC partner through which we could provide totally integrated solutions which will serve Iraq and the region.

## OUR FUTURE VISION

- ▶ We are looking forward to cooperate with ITPC and to get License for boarder connectivity, with the neighboring countries mainly - Turkey- in order to achieve our strategy in Iraq as one of the main data and connectivity service provider in Iraq.
- ▶ in the process of introducing the most optimum of the major popular technology of the Fiber, DWDM & IP technology into the region. Our company is taking on the task of simplifying the market and testing for technical issues and customer satisfaction to ensure the success of our projects.
