WHY Become your own cloud provider "AWS/Azure " ?

## more VALUE

- Ultimate **Security**
- Self-serve **Scalability**
- Powerful **Recovery**
- **Flexible** Billing
- You own your Cloud in Your **OWN DC**
- **8** supported OS & **15** App (1 click) templates

simply BETTER

- **Best** in class Networking features
- **Seamless** integration
- Full **Automation** - RESTful **API**
- Enterprise grade **Clustering** (HA & DR)
- **White Label**

What To Expect ?

Platform Packages Blueprints

- ➤ Windows
- ➤ Linux
- ➤ **Your Own ISO**
- ➤ SQL Server
- ➤ MySQL
- ➤ Postgres

Capabilities

- ✓Custom Packages
- ✓Easy to Scale
- ✓DNS Management
- ✓Flexible Recovery & Billing
- ✓Audit and Security

Unique Add-Ons

- ✓One click Firewall
- ✓Disaster Recovery
- ✓Powerful API
- ✓Team Oriented
- ✓One click VPN
- ✓Startup Scripts

Controls ?

One Click

➤ Create

➤ Delete

➤ **Resize (up/down)**

➤ Rename (FQDN)

➤ Console Access

➤ Add IP/s

➤ Reset Passwords

➤ Restore (Same IP)

IPs

✓Public IPv4

✓Public IPv6

✓Private IPv4

✓Firewall IP

✓Multiple IPs per Instance

Recovery

✓Automatic Backup

✓Backup on Demand

✓Snapshots

✓Clone

✓One click restore

✓Auto billed backups

Some Key Factors

Billing	**Security**	**Hardware**

➢ Credit Card (Auto charge)

    ➢ PayPal

    ➢ Voucher

    ➢ VAT/TAX

    ➢ Bitcoin

    ➢ Prepaid

➢ Own Gateway!

✓Firewall -Tenants

✓SSL Encryption

✓PCI Compliance

✓Multi-Factor

✓Fraud Prevention

✓Full Audits

✓New – OLD Any brand

✓Used / Refurbished

✓Any capacity

✓Mix & Match

✓Buy Overtime (When needed)
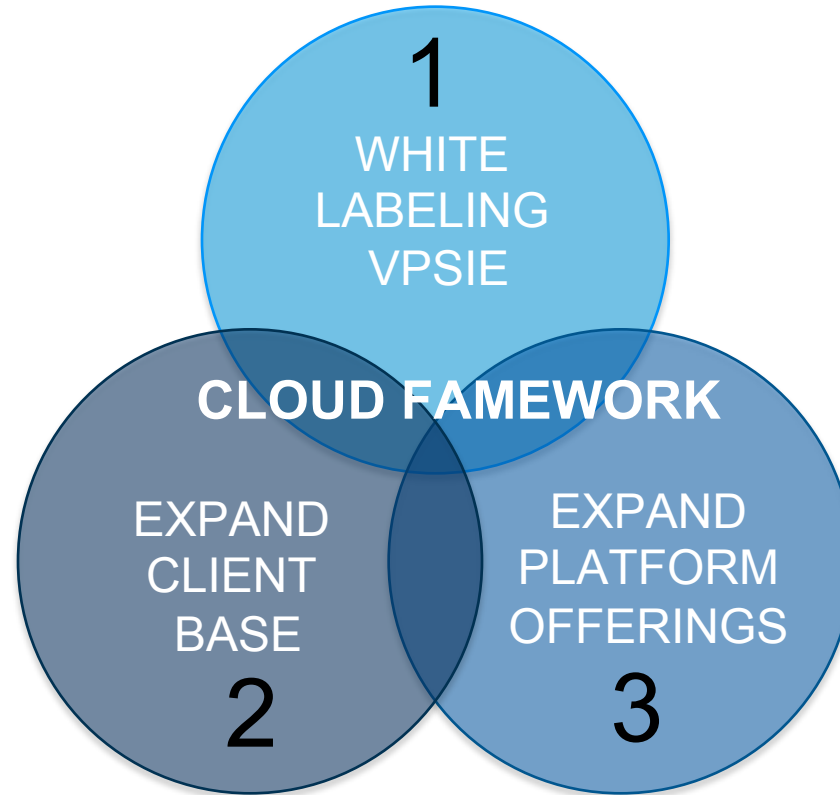

✓Saving

No confusing layers - Just great value

- You own and control the **network**,**servers, Data**, **IPs, Images** & **Automation**

- We **only** make this possible - hardened Isolation.

Fast SSD Storage & Fiber channel support

VPSie Licensing Facts

- VPSIE- License model per HyperVisor (CPU and Memory)

- No Limit on Storage capacity.

- White label your brand – Your logo – your themes

- No need to have different billing system – it's built in.

- Scale up or down **individual** resources when you need to.

- No one is looking over your data, Total isolation within hypervisor tenants

Key Points

- Database as a service
  Multi-Tenant

- Hadoop / Big data automation

- Load Balancing - farm of servers LB

- Robotics Automation

- Automate integration private clouds

Thanks!
